

WILD ANIMALS

Mammals

- elephant
- lion
- zebra
- bear
- kangaroo
- monkey
- tiger
- rhino
- dolphin
- whale
- chimpanzee
- camel
- deer
- seal

Reptiles

- snake
- crocodile
- lizard
- turtle

Birds

- eagle
- ostrich
- parrot
- pigeon
- owl
- falcon

Insects

- spider
- ant

Carnivores

- lion
- tiger
- snake
- crocodile
- eagle
- whale
- shark
- dolphin
- monkey
- leopard
- bear
- octopus
- cheetah

Herbivores

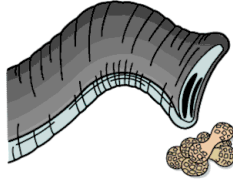

- elephant
- kangaroo
- monkey
- zebra
- deer
- camel
- horse
- turtle
- koala

Animal Body Parts

wing

trunk

tusk/ivory

claw

- fur: kürk
- fin: yüzgeç
- scale: pul

- skin: deri
- feather: tüy

- stripe: ince şerit
- neck: boyun
- tail: kuyruk

Vocabulary

- carnivorous: etçil
- herbivorous: otçul
- poisonous: zehirli
- sharp: keskin
- extinct: soyu tükenmiş
- huge: kocaman
- hunter: avcı
- prey: av
- alone: yalnız
- surface: yüzey
- saber-toothed
(keskin dişli)
- weigh: ağırlık
- species: tür

- in danger: tehlikede
- habitat: doğal ortam
- kill: öldürmek
- destroy: mahvetmek
- cut down: kesmek
- overhunt:
(aşırı avlamak)
- endangered:
(nesli tükenmekte olan)
- protect: korumak
- pollute: kirletmek
- volunteer: gönüllü
- cave: mağara
- enormous: kocaman

- grass: ot
- charity: bağış
- precaution: önlem
- cage: kafes
- altitude: yükseklik
- cold-blooded
(soğukkanlı)
- warm-blooded
(sıcak kanlı)
- vertebrate: omurgalı
- shed: dökmek
- zoologist
(hayvan bilimci)
- domesticated: evcil

Habitats of Wild animals

- land: kara
- sea: deniz
- lake: göl
- ocean: okyanus
- forest: orman
- jungle: sık orman
- rainforest: yağmur ormanı
- grassland: otlak
- desert: çöl
- pole: kutup
- savannah: geniş çayır/bozkır

Characteristics of Animals

Elephant

Kind	Mammal and Herbivorous
Habitat	Savannah
Size/Weight	5-6m high/6.000 kg
Body parts	long trunks,tusks and ears
Lifespan	60-70 years

Elephants are mammal and herbivorous. Their habitats are generally savannahs. They weigh about 6000 kilograms and measure about 5 or 6 meters. Elephants have long trunks,tusks and ears. They can live about 60-70 years.

Eagle	
Kind	Carnivorous/Bird
Habitat	forest near lakes/rivers
Size/Weight	1.8-2.3 m/3-6.5 kg
Body parts	long wing
Lifespan	35 years

Eagles are bird and carnivorous. Their habitats are forests near lakes or rivers. They weigh about 3 or 6.5 kilograms and measure 1.8 or 2.3 meters. Eagles have long wings and very sharp eyes. They can live about 35 years.

Making Suggestions should/shouldn't

- We should save natural habitats.
- We should protect wild life.
- We should plant trees.
- We should keep seas clean.
- We shouldn't wear fur.
- We shouldn't hunt endangered animals.
- We shouldn't cut down trees.
- We shouldn't pollute air and water.
